this book which presents the whole splendid history of english literature from anglo saxon times to the close of the victorian era has three specific aims the first is to create or to encourage in every student the desire to read the best books and to know literature itself rather than what has been written about literature the second is to interpret literature both personally and historically that is to show how a great book generally reflects not only the author s life and thought but also the spirit of the age and the ideals of the nation s history the third aim is to show by a study of each successive period how our literature has

steadily developed from its first simple songs and stories to its present complexity in prose and poetry to carry out these aims we have introduced the following features 1 a brief accurate summary of historical events and social conditions in each period and a consideration of the ideals which stirred the whole nation as in the days of elizabeth before they found expression in literature 2 a study of the various literary epochs in turn showing what each gained from the epoch preceding and how each aided in the development of a national literature 3 a readable biography of every important writer showing how he lived and worked how he met success or failure how he influenced his age and how his age influenced him 4 a study and analysis of every author s best works and of many of the books required for college entrance examinations 5 selections enough especially from earlier writers and from writers not likely to be found in the home or school library to indicate the spirit of each author s work and directions as to the best works to read and where such works may be found in inexpensive editions 6 a frank untechnical discussion of each great writer s work as a whole and a critical estimate of his relative place and influence in our literature

in almost all states poetical composition has been employed and considerably improved before prose first because the imagination expands sooner than reason or judgment and secondly because the early language of nations is best adapted to the purposes of poetry and to the expression of those feelings and sentiments with which it is conversant thus in the first ages of greece verse was the ordinary written language and prose was subsequently introduced as an art and invention in like manner at rome during the early advances of poetry the progress of which has been detailed in the preceding volume prose composition continued in a state of neglect and barbarism the most ancient prose writer at least of those whose works have descended to us was a man of little feeling or imagination but of sound judgment and inflexible character who exercised his pen on the subject of agriculture which of all the peaceful arts was most highly esteemed by his countrymen
